

LIVE DEMO OF

SMART DEVELOPMENTS
FOR CONTINUOUS GAS SUPPLY
IN PRESSING SITUATIONS

FOR BUSINESS, NEWS, AND TECHNOLOGY EDITORS

BY **CONCOA** –

World leader in gas pressure and flow technologies

AT PITTCON 2010 – Orlando
Orange County Convention Center

March 1 – 4
8 a.m. – 5 p.m.
Booth # 3141

Showcasing the

542 Series High-Flow Generator Backup

Featuring automatic activation of the generator/backup reserve supply,
Providing gas without interruption

Ideal during power loss or if supply systems provide insufficient gas
In high-flow building/facility systems utilizing
Nitrogen, air, helium, carbon dioxide, oxygen, argon

Revolutionary new I-LINK Web server technology
Allows users to remotely control, program, and monitor
Backup pressure, low-reserve alarm point, and pipeline pressure and reserve

To set up a time to see this important new development,
