

# CONCOA Laboratory Systems: Everything Under One Roof

LAB SYSTEMS

CONCOA's complete line of laboratory gas control equipment is the ideal solution to designing or outfitting your facility with the most reliable high purity gas control equipment. From continuous gas supply systems that handle any source to point of use pressure and flow control panels, CONCOA has it all under one roof, yours. By designing your laboratory, chemical process plant or bio-pharmaceutical operations using CONCOA products, you are guaranteed improved analytical results and process control with long term cost savings. Managing and controlling your gas supply is at your fingertips or on your computer with our revolutionary products.

## Choose your solution:

### Electronic Switchovers:

538 Series Intelliswitch II universal computer controlled gas switchover system with web server.  
539 Series Intelliswitch universal computer controlled switchover.

### Automatic Switchovers:

526 or 527 Series ultra high purity switchovers

### Generator Backup:

540 Back Up Panel  
542 High Flow Generator or Bulk Backup System

### Remote Monitoring:

538 Series Intelliswitch II I-Link™ Web Server and Embedded Software  
Advantium Plus Alarm Systems

### Point of Use Control:

53 & 54 Series Point-of-Use Panels  
400 or 300 Series Line Regulators

### Flow Control:

560 & 565 Series Flowmeters  
566 Series Purge Meters  
567 Series High-Flow Flowmeters  
MFM Series Mass Flowmeter  
MFC Series Mass Flow Controller  
CCD Series Controller Display
