

# SPECIAL PURPOSE REGULATOR

## 1400 SERIES Ultra High-pressure Delivery

The 1400 Series Ultra-High-pressure regulator provides primary control of high-pressure gas sources requiring outlet pressures up to 6000 PSIG with inlet pressures up to 6000 PSIG. The heavy duty internals enable high delivery pressures while the brass piston design provides steady and reliable pressure control. Combined with robust materials of construction and a wide range of compatible gases, the 1400 series is an ideal choice for industrial gas applications requiring ultra-high delivery pressures.
