

FLOW CONTROL REGULATORS

5500 SERIES

Medium Duty MIG and TIG Welding and Blanketing

The 5500 Series Medium-Heavy welding and blanketing regulator provides primary flow control of industrial gas cylinders in applications requiring inlet pressures up to 5500 PSIG and flow rates up to 200 SCFH. The rugged brass barstock construction provides high durability while the encapsulated seat design provides accurate pressure control and extended component lifecycle. Combined with compatibility of a wide range of gasses, the 5500 is an ideal choice for medium duty MIG and TIG welding and blanketing applications.
