Gas Supply

67B SERIES

The 67B series high-pressure, ultra-high flow regulator is designed to provide steady and reliable control from liquid and high pressure gas sources requiring delivery pressures up to 750 PSIG and flow rates up to 24,000 SCFH. The ISOFLOW technology enables constant outlet pressure regardless of inlet pressure fluctuations while the 1/2" and 3/4" porting sizes and 2.3 Cv enable the highest possible flow rates. Combined with robust materials of construction and a low static design, the 67B series is the ideal choice for liquid and high pressure source applications.

Advanced Features

- LOW STATIC DESIGN** Liquid or high pressure cylinder use
- DELIVERY OPTIONS UP TO 750 PSIG** Broad range of applications
- FRONT AND REAR PANEL MOUNTABLE** Flexible installation
- 40-MICRON INTERNAL FILTER** Limits possibility of gas contamination

67B 5330 F000 shown

Applications	Materials of Construction	Specifications
Micro Bulk or Bulk Supply Systems Nitrogen Oxygen	Body Brass barstock	Max Inlet Pressure 3000 PSIG (210 BAR)
Fiber Laser Assist Gas Supply Nitrogen Oxygen Air Argon	Bonnet Brass barstock	Temperature Range -40°F to 140°F (-40°C to 60°C)
Assist Gas Delivery from High Pressure Supply Nitrogen Oxygen	Seat Viton® or Chloroprene	Gauges 2-1/2" dual scale (ANSI/ASME B40.1)
	Dynamic Cartridge Brass barstock	Inlet and Outlet Connections 1/2" or 3/4" FPT (primary ports) 1/4" FPT (auxiliary ports)
	Internal Seals PTFE and Viton	Cv 2.3
	Filter 40 micron 316L stainless steel	Weight 7.3lbs (3.3kg)
