POINT OF USE EQUIPMENT

STATION VALVES

CONCOA station valves eliminate the need for a separate check valve by adding a non-return feature to the typical shut-off valve. With a high-flow capacity and a 200 PSIG maximum operating pressure, these valves are suitable for heavy-duty pipeline use. Station valves have built in non-return valves to meet NFPA 51 and OSHA requirements.

Applications	Materials	of Construction	Specific	cations	
Welding, Cutting & Heating MIG/TIG Welding	Body Forged bra	ass body	Max Inlet F 200 PSI		
, and the second	Bonnet Forged bra	Bonnet Forged brass		Temperature Range 0 to 140° F (-18 to 60° C)	
	Seat Chloroprer	Seat Chloroprene		Inlet Connections ½" MNPT	
	Diaphragm Chloroprer	ne			
	Seat Holder Brass

HALF-INCH VALVES

801 8001

CONCOA high pressure master valves are used on tube trailers, high pressure manifolds and piping systems. These valves exhibit a very low operating torque under pressure for ease of use.

General Purpose

Materials of Construction	Specifications
Body Brass	Max Working Pressure 5600 PSIG
Bonnet Brass	Temperature Range -40 to 165° F (-40 to 74° C)
Seat Material CTFE	Inlet/Outlet Connections ½" FNPT
Seals PCTFE	Cv 2.6
