## Point-of-Use Panels

The 54 Series Point of Use Panels provide a modular design to mount and locate 400 Series regulators at the point of use for the most demanding gas applications. They are intended to provide final pressure control for research and ultra high purity gases or, in the case of the 54S, even corrosive service gases or mixtures. The high leak integrity of  $1 \times 10^{-9}$  cc/sec ensures delivery of those gases in an unaltered state to the most sensitive process or instrumentation applications. Supplied with up to four regulators per panel they are ideal permanent fixtures for point of use pressure control.
