

MANIFOLD FLOOR STANDS

CONCOA Floor Stand Kits provide a convenient method to mount a gas manifold extension or gas cylinder switchover where a permanent structure is unavailable. Made from durable plated steel, manifold floor stands are pre-drilled and include the necessary hardware to safely secure cylinders that otherwise are unable to support themselves.

Typical Applications

- Medical or Industrial Gas Storage and Use Areas
- Pharmaceutical and Forensic Gas Industry
- Laboratory, Research, or Process Plants
- Manufacturing Systems

Features

Heavy Duty Steel Construction provides durability and stability in high-demand environments

Modular Extension Design accommodates cylinders of various sizes

Integrated Safety Chains ensures safe restraint of high-pressure cylinders

Freestanding Floor-mount Structure allows flexible system expansion or reconfiguration

Materials and Specifications

Posts: 7ft (2134mm) zinc-plated steel

Post Base: 1/4in thick, 6in x 6in zinc plated steel

Chains: 42in (1067mm) zinc-plated steel

Chain Mount Plate: Powder-coated steel

Conformances: Meets NFPA1; OSHA standards
